

NovaRock Biotherapeutics Open Position

Job Description

NovaRock Biotherapeutics is a fast-growing start-up company dedicated to the discovery, development, and commercialization of potentially transformative therapeutics for diseases with few or no clinical options. We offer a technologically and scientifically rigorous environment, with all the fun, passion and high career growth opportunity that a start-up provides, plus a competitive compensation package including excellent benefits.

We seek a highly motivated Senior/Principal Scientist in Protein Science, specifically bi-specific antibody area to join our discovery team at our New Jersey site (Ewing, NJ).

Job description

The scientist will be responsible for the design, production, and characterization of bi-specific antibodies. This role will involve construct design, format comparison, protein production, and bi-specific antibody analysis. Candidates must be motivated and dynamic with strong attention to detail. Candidates will be expected to maintain good documentation of their work using an electronic notebook and for inclusion in regulatory documents for future regulatory filings.

Qualifications

- Hands-on experiences on bi-specific antibody production and/or characterization
- Familiar with major bi-specific antibody format
- Familiar with antibody Fc engineering
- Good conceptual, analytical thinking and problem-solving skills
- Excellent communication and organizational skills
- Ability to multi-task and manage time appropriately
- Ability to work effectively in a team environment
- Ability to independently lead projects
- Previous experience or understanding of structural biology is a plus.
- Experiences on Bioanalytics is a strong plus
